Barkhausen Institut gGmbH - Internet der Dinge

The Barkhausen Institut performs research on the latest hardware, software and communication technologies and demonstrates their application in tomorrow’s society. Our goal is to build a flexible and trustworthy IoT platform based on reliable electronics and secure communication methods. The Barkhausen Institut group Composable Operating Systems is developing a secure and efficient meta-operating system for cloud datacenters, based on a scalable, distributed capability system.

Research Associate (PhD or Postdoc) “Datacenter Systems Software” (m/f/d)

City: Dresden; Starting Date: At the earliest possible; Duration: The position will initially be filled for a period of 2 years.; Renumeration: The position will be remunerated in accordance with the public remuneration level TV-L E-13.; Reference number: Fract OS

Working field

- Besides contributing your unique ideas, you will work at the systems and device-driver level to support us in our vision of building secure and efficient platforms:
  - Design and implementation of system-level software for datacenters.
  - Orchestration of InfiniBand communication and SmartNIC-based resource mediation
  - Development of novel approaches for integrating heterogeneous devices
  - Development of use cases and IoT demonstrators
  - Participation in writing research publications and project deliverables
  - Engagement in Science Communication: In cooperation with our OpenLab team, you will participate in activities that aim to explain research results in dialog with society.

Requirements

- Above-average MSc/Diploma and PhD degree in areas related to our research focus (Computer Science) from renowned universities.
- Good programming skills in C++ and possibly Rust, especially asynchronous code
- Good knowledge of operating systems and distributed systems concepts
- Knowledge of secure system principles and microkernels
- An integrative and cooperative personality with excellent communication and social skills.
- Good communication and writing skills in English.
What We Offer

- Cross-disciplinary projects
- Influential work on upcoming technologies
- An open and creative team
- Agile working hours and workflows
- Flat hierarchies for your ideas to soar
- Competitive salary

Life and science are compatible at our institute. We offer a range of recognised family-friendly measures, such as part-time work, mobile working and flexible working hours that take family needs into account. We also offer support for arriving in Dresden (all formalities, apartment etc.).

Application

Your application should include: motivation letter explaining your decision to apply at the institute, CV, copy of university degree and PhD certificate, short summary of doctoral thesis, list of publications.

Applications from women are particularly welcome. We only accept complete documents as one single PDF document by e-mail to careers@barkhauseninstitut.org. Please reference “Research Associate Fract OS” in the subject line. Applications that contain other file formats (e.g. Word, Excel) will not be considered in the selection process. Informal inquiries can also be submitted to the same address. The data submitted by you in the course of the application procedure will be processed by the Barkhausen Institut (BI). BI shall use the data for the purposes of the application procedure. No data shall be passed on to third parties.
